DETAILED ACTION

1. This communication is responsive to amendment filed on 21 Feb 2006. Claims 1 – 46 are pending examination. Upon further consideration of the application further restriction deemed necessary.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 24, 29 – 42 and 45 are drawn to Using interconnected networks, classified in class 709, subclass 218.
- II. Claims 25 – 28, 43, 44, drawn to client/server, classified in class 709, subclass 203.

The inventions are distinct, each from the other because of the following reasons:

Group I contains the following limitation " formatting ,outside the client device, unsolicited advertising information from the advertisement , the unsolicited advertising information including: service information indicating the purpose of the advertisement; data entry information indicating purchasing options based on the purpose; and contact information containing instructions for enabling the client device to communicate, with the service; forming an advertising signal containing the unsolicited advertising information; propagating the advertising signal from a transmitter to the client device within the location; receiving the advertising signal at the client device;

decoding the advertising signal to extract the unsolicited advertising information;
displaying the unsolicited advertising information to a user of the client device; and
determining, by the client device, a response to the advertising signal, based on the

unsolicited advertising information " that is not in Group II. Similarly group II has
the limitation "receiving an unsolicited broadcast message having user-specific
service information about a service from a service provider into a client device;
creating, by the client device, an object-oriented service object from the service
information;

activating the client device, the service object ;

receiving, by the client device, user data into the service object;

sending, by the client device, the user data to the service provider ;

receiving, by the client device, service provider data required to utilize the service
from the service provider ; and

displaying by the client device, the service provider data required to utilize the
service ; that is not in group I. Therefore restriction deemed necessary.

2. Applicant is reminded that upon the cancellation of claims to a non-elected
invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one
or more of the currently named inventors is no longer an inventor of at least one claim
remaining in the application. Any amendment of inventorship must be accompanied by
a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A shortened statutory period for response to this action is set to expire thirty days
from the mailing of this communication. Failure to respond within the period for

Art Unit: 2157

response will cause the application to become abandoned (35 USC 133). Extension of time may be obtained under provision of 37 CFR 1.136(A).
